

Close analysis of the remaining two rationales reveals that such reasoning is consistent with federal law and is supported by substantial evidence. These two arguments are: (1) the Agreements use of the word "billable" requires reciprocal compensation for Internet traffic because Ameritech bills such calls as local; and, (2) the industry use of the word "terminates" requires a finding that the call to the ISP terminates at the ISP.

First, the "billable" rationale is a reasonable interpretation of the contracts. Ameritech argues that such a reading is wrong as a matter of law, contending that the Agreements define local traffic based not on billing treatment, but on points of origin and termination of the traffic. (Ameritech Resp. at 14.) Ameritech further informs that the billing practice for Internet calls is identical to the billing treatment of FGA calls, and therefore the Commission's holding would make FGA calls "local." Ameritech does not cite any cases to support this proposition. Furthermore, Ameritech ignores the fact that the Agreements specifically exclude FGA calls from the reciprocal compensation provision. No such explicit provision is found in the Agreements regarding Internet calls. In fact, the Internet and ISPs are not even mentioned in the Agreements. No doubt the next time Interconnection Agreements are negotiated between the parties such a provision regarding the termination of Internet calls will be the subject of vigorous discussion. However, this court will not impose such a provision into the Agreements as written.

(Ameritech Merits Brief at 10.) However, Ameritech does not cite a single statute or ruling in support of this view. Although it may be appealing to analogize the two types of calls as functionally similar, this court will not be swayed by such argument. As previously discussed, a special provision in the Interconnection Agreements explicitly excludes FGA calls from paying reciprocal compensation. No such exception is provided for Internet calls.

Although reasonable persons may differ on the interpretation of the language of the Agreements, a finding that calls that are billed as local must receive reciprocal compensation is not violative of current federal law. Furthermore, such a finding is a reasonable interpretation of the contracts and is neither arbitrary nor capricious. It is undeniable that Ameritech has consistently billed its customers for their calls to ISPs as local calls. This court therefore concurs with the ICC's conclusion that the Ameritech billing scheme warrants a finding that such calls are subject to reciprocal compensation.

Second, this court finds that the ICC's determination that calls to the ISP terminate at the ISP is not contrary to federal law and is supported by substantial evidence. Ameritech's argument that federal law requires that this court adopt a "jurisdictional" standard for termination that would be measured on an "end-to-end" basis is not convincing. Although Ameritech is correct that "end-to-end" language is used in some earlier FCC decisions in different contexts,¹¹ the FCC has not issued any rulings indicating that Internet calls must be measured on an end-to-end basis, with the ultimate web site qualifying as one "end." Furthermore, all of the cases cited by the plaintiff in support of its end-to-end argument are from the pre-1996 Act era. (See Ameritech Mem. at 17-18.)

¹¹ See, e.g., Southwestern Bell Tel. Co. Transmittal Nos. 1537 & 1560 Revisions to Tariff F.C.C. No. 68, Order Designating Issues for Investigation, 3 F.C.C. Rcd. 2339, ¶ 28 (1988) (rejecting the view that two calls are created by the use of a 1-800 number for a credit card call and stating that "[s]witching at the credit card switch is an intermediate step in a single end-to-end communication."); Petition for Emergency Relief and Declaratory Ruling Filed by the Bellsouth Corporation, 7 F.C.C. Rcd. 1619, 1619-21 (1992) (finding that a call to an out-of-state voice mail service is a single interstate communication); Long-Distance/USA, Inc., 10 F.C.C. Rcd. 1634, ¶ 13 (1995) (finding that 1-800 calls are a single communication; "both court and Commission decisions have considered the end-to-end nature of the communication more significant than the facilities used to complete such communications).

Instead of classifying the web sites as the jurisdictional end of the communication, the FCC has specifically classified the ISP as an end user. See, e.g., Third Report and Order ¶ 288. Given the absence of an FCC ruling on the subject, this court finds it appropriate to defer to the ICC's finding of industry practice regarding call termination. Indeed, the Internet Agreements themselves authorize the Commission to determine when a call qualifies as "local."¹²

The ICC's decision included the following finding of fact regarding call termination:

[W]e are persuaded by Mr. Harris' explanation of industry practice with respect to call termination. He testified that call termination within the public switched network "occurs when a call connection is established between the caller and the telephone exchange service to which the dialed telephone number is assigned . . ."

(Order at 11.) This definition of "termination"¹³ is crucial to understanding the meaning of the Agreements, as the Agreements specifically use the word termination in defining reciprocal compensation. When a customer of a LEC dials the ISP's local, seven-digit number, the customer

¹² TCG's Agreement provides that "local traffic" is "local service area calls as defined by the Commission." (TCG § 1.43.) The Agreements of the other Carrier defendants provide that a "local call" is:

a call which is fifteen (15) miles or less as calculated by using the V&H coordinates of the originating NXX and the V & H coordinates of the terminating NXX, or as otherwise determined by the FCC or Commission for purposes of Reciprocal Compensation; provided that in no event shall a Local Traffic call be less than fifteen (15) miles as so calculated.

(MFS § 1.38; MCI § 1.2; AT&T § 1.2; Focal § 1.46.) (emphasis added).

¹³ The ICC's definition of "termination" closely follows that adopted by the ICC. See, e.g., Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, CC Docket No. 96-98, First Report and Order, ¶ 1040 (Aug. 8, 1996) ("We define 'termination,' for purposes of section 251(b)(5) [the reciprocal compensation provision of the Telecommunications Act], as the switching of traffic that is subject to section 251(b)(5) at the terminating carrier's end office switch (or equivalent facility) and delivery of that traffic from that switch to the called party's premises.").

is connected to the ISP. Once this "call connection" is established between the caller and the telephone exchange service of the seven-digit number, the call is deemed "terminated" for purposes of the Agreements. The fact that the ISP then connects the user to the Internet, where the user may access unlimited web sites, does not alter the fact that the call has been "terminated" at the ISP for purposes of reciprocal compensation.

J. THE ICC ORDER VIOLATES SECTION 251(G) OF THE ACT

Ameritech's final argument is that the ICC's order violates Section 251(g) of the Telecommunications Act. Pursuant to Section 251(g),

On or after February 8, 1996, each local exchange carrier, to the extent that it provides wireline services, shall provide exchange access, information access, and exchange services for such access to interexchange carriers and information service providers in accordance with the same equal access and nondiscriminatory interconnection restrictions and obligations (including receipt of compensation) that apply to such carrier on the date immediately preceding February 8, 1996 under any court order, consent decree, or regulation, order, or policy of the Commission, until such restrictions and obligations are explicitly superseded by regulations prescribed by the Commission after February 8, 1996. During the period beginning on February 8, 1996 and until such restrictions and obligations are so superseded, such restrictions and obligations shall be enforceable in the same manner as regulations of the Commission.

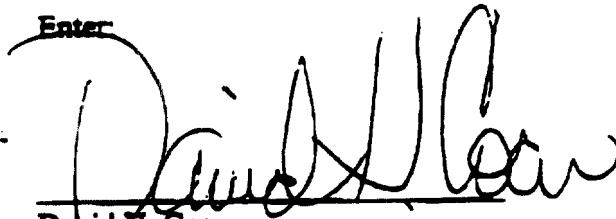

According to Ameritech, because no court order, consent decree, regulation, order, or policy of the FCC provided for the payment of reciprocal compensation prior to February 7, 1996, reciprocal compensation cannot now apply. Ameritech states that reciprocal compensation could only apply if the FCC were to explicitly so require by regulation. Such an argument is circular, and escapes the logic of this opinion. Section 251(g) merely provides that local exchange carriers must provide services with the same "equal access and nondiscriminatory interconnection restrictions and obligations" as prior to the passage of the Telecommunications Act, until such restrictions or

obligations are superseded. As this court has found that the FCC has no prior ruling that controls in the instant case, there is no ruling that could possibly be violated by ordering continued payments of reciprocal compensation by the plaintiff. Furthermore, as the defendants point out, Ameritech did indeed pay reciprocal compensation for local calls prior to the passage of the Act.

IV. CONCLUSION

For the reasons stated in this Memorandum Opinion and Order, this court affirms the Commission's determination that Local Exchange Carriers are entitled to reciprocal compensation under the Interconnection Agreements for Internet calls. The stay of the Commission's order is continued for an additional thirty-five (35) days to allow the parties to appeal.
